JTIMS #1658

Provide JMSEL Managers the ability to copy cells imported from JMSEL v2.6 to new Event Scenarios

Edit and Copy JMSEL v2.6 Cells from [Source Event Name] [FY]-[Sequence #]

Some of the data may not be available for copy into JTIMS Enterprise as-is due to system differences. Before the cells can be copied, you are required to enter or select new values for some of the fields which will conform to the JTIMS Enterprise business rules. The warning icon ⓘ indicates whether the field requires updates. Place your mouse cursor over the icon to reveal additional details about why the data needs to be entered or changed.

Note: MSEL Mgr is the default cell in JMSEL v2.6. If you select this cell for copying, the associated fields will overwrite the existing values of the same fields for the default Manager cell in your event scenario.

Existing Data for [Target Event Name] [FY]-[Sequence #]

This table displays the cell data that currently exists within your Event Scenario for your reference.

Legend	Name	Inject Format Prefix	Inject Format Lower Bound	Inject Format Upper Bound	Email	DSN

JTIMS #1658

Provide JMSEL Managers the ability to copy release process steps imported from JMSEL v2.6 to new Event Scenarios

Edit and Copy Release Process Steps from [Source Event Name] [FY]-[Sequence #]

Existing Data for [Target Event Name] [FY] - [Sequence #]

This table displays the release process steps that currently exist within your Event Scenario for your reference.

Order	Processing Cell	Step Name	Set Status	Description
1	ALL	Default	No Change	Default Release Process Step
2	Cell_Name_1	Step_Name_1	Draft in Progress	This is a description
3	Cell_Name_2	Step_Name_2	Deferred	This is a description
4	Cell_Name_3	Step_Name_3	Confirmed	This is a description

JMSEL v2.6 data to be copied into JTIMS JMSEL

Some of the data may not be available for copy into JTIMS Enterprise as-is due to system differences. The information icon  indicates whether the field must be updated. Place your mouse cursor over the icon to reveal additional details about why the data needs to be entered or changed. Because Next Step(s) contains self-referential data, it may not be viewed or edited until after the copy is complete. Additionally, if you would like to choose the processing cell or set status from data copied from JMSEL v2.6, it is recommended that you copy cells and statuses prior to copying release process steps.

Note: The default release process step will overwrite the default release step in JTIMS Enterprise. If a step from JMSEL v2.6 has the same name as an existing step in the Event Scenario the step from JMSEL v2.6 will overwrite it. All other steps will be appended to the existing Event Scenario release process. The order may be edited once the steps have been copied into JTIMS JMSEL.

* Required

* Choose Cell	* Step Name	* Legend	* Set Status	Description
ALL 	2.6 Default	 	No Change	2.6 default step
2.6 Cell 1	2.6 Step_Name_1	 	No Change 	2.6 description 1
2.6 Cell 2	2.6 Step_Name_2	  	No Change	2.6 description 2
ALL	2.6 Step_Name_3	 	No Change	2.6 description 3

JTIMS #1658

Provide JMSEL Managers the ability to copy user assignments imported from JMSEL v2.6 to new Event Scenarios

Edit and Copy 2.6 User Assignments from [Source Event Name] [FY]-[Sequence #]

Existing Data for [Target Event Name] [FY] - [Sequence #]
 This table displays the user assignments that currently exist within your Event Scenario for your reference.

Name	Cell
Last Name, First Name X	Manager (primary), Cell_Name_1
Last Name, First Name Y	Cell_Name_3
Last Name, First Name Z	Cell_Name_3

JMSEL v2.6 data to be copied into JTIMS JMSEL

The table below shows the data imported from JMSEL v2.6 for the selected event. If you would like to assign users to cells copied from JMSEL v2.6, it is recommended that you copy cells prior to copying user assignments. Users can only be assigned to cells that currently exist within the Event Scenario. If a cell imported from JMSEL v2.6 does not match one that exists in the Event Scenario, the information icon ⓘ will display indicating that the data may require an update.

To copy cell assignments, select which items should be copied. Next, map each JMSEL v2.6 user to a valid JTIMS Enterprise user account. Click the 'Search for JTIMS User' link to search for and select a user. If necessary, edit the assigned cells. If you need to sort the grid or navigate to another page, click Save prior to doing so to avoid losing any updates. Click Copy and Return to complete the copy process.

Note: The default MSEL Mgr cell maps to the default Manager cell in JTIMS Enterprise.

* Required

METL Requirements

JTMS1483

Redesign the METL view so that Subordinate Unit and Command-linked Tasks selected in a higher organization's METL appear in the command/organization's METL Views.

- If the Mission/MET is from an external mission, the system will display a light grey background at the intersection of the Mission/MET and the user will be able to view the TPA Details.
- If the Mission/MET is from both a Command mission and an external mission, the system will display the appropriate color and letter rating for the task/command mission combination and indicate that there are TPA ratings from external missions.
